

# FMRadioRecorder

Record FM Music & Listen Anytime, Any Place

- Listen & Record FM Radio, Music & Programming
- Extracts Music Tracks & Talk Radio from FM
- Automatically Finds Song Title, Album, Artist Name
- Transfer FREE FM Music to iTunes/iPod, Zune or Any Portable Music Player

Plug the FM Radio Recorder into your USB port and watch your music collection grow. Record individual songs, new music, live sessions, talk radio shows, interviews and build the ultimate music library completely customized to exactly what you want for FREE! No subscription fees!

Simply decide what stations and programs you want to monitor and let FM Radio Recorder with Snaptune One do the rest. Audio tracks are automatically separated and Snaptune One works with an Internet based database which provides details like Song Title, Artist, Album Artwork & CD information. Everything that FM Radio Recorder records is indexed so you can listen to it when you want.

#### Benefits:

- FREE FM Radio
- Automatically Receive Detailed Song Info via the Internet
- Effortlessly Organize All Of Your Recorded Music and Talk Shows
- View and Save RDS Information Streamed From Radio Stations
- Record Programming While You Are Away

#### Snaptune One Included Inside

Discover new music or rediscover old music with Snaptune One's song identification feature. Record programming from FM Radio and Web Radio stations for easy playback.

#### Instant Radio Included Inside

ADS Tech's Instant Radio application allows you to easily tune across the FM band. Instant Radio can record live broadcasts and display RDS/RBDS data such as station call letters, radio text and more.
