- Free offline graphics license with registration
- Pre-assembled, pre-configured turnkey systems

Single Channel HD/SD standalone broadcast graphics system for any type of application

Compix ConverG1 Is One of a Kind

When you need a character generator, with no other bells or whistles that drive up the cost and slow you down, the industry proven multi-format ConverG1 is ready to go. All ConverG1 configurations feature standard rolls, crawls, over 260 transition effects, and a user definable clock and timer. The system comes with bundled backgrounds, shapes, templates and 4000 preloaded True Type fonts to make design work a snap. You can setup an entire graphics look offline, and then take those graphics immediately to air, while at the same time editing the next on air series in VGA preview.

Single-Channel Configurations in HD, HD Ready, SD-SDI and Analog

The ConverG1 lineup provides you with the graphics you need today, with an elegant upgrade path for your future. Using the multi-format GenCG graphics creation, layout and playback software, packed with 4000 pre-loaded 4000 True Type fonts, with bundled backgrounds, elements and templates, all included. Compix ConverG1 system upgrade options make a perfect fit for any 16:9 or 4:3 aspect ratio environment working in HD, SD-SDI or analog video, all with full broadcast quality output.

Why Future Proof?

Work in the video format you need now, and leave your upgrade money in the bank. Compix makes it simple for you to grow from SD-SDI to full HD-SDI with the ConverG1 HD ready configurations, and moving from analog to SD-SDI is just as easy, all with a simple firmware update. The ConverG1 systems offer a unique set of upgrade options that make it perfect for any video production environment working in any combination of HD, SD-SDI or composite video now, and covers your needs that will require an upgrade in the future.

Style Catalogs for Quick Access

GenCG makes graphic creation fast and easy with Compix style catalogs, with often used graphic elements like backgrounds, animations, fonts, and complete templates available to get the proper preset look to air quickly - with all of the pieces in all of the right places.
